

Data Center Asset Disposition

Secure IT Asset Disposition

When retiring computer assets from your datacenter you will often have special on-site requirements for managing company equipment, value and reputation.

IT Asset Disposition services from Prolimax help your company maximize the value of idle and decommissioned products by converting surplus IT assets to value, through remarketing or, when equipment represents no value, recycling according to all standards and legislative requirements that apply. Data bearing devices are sanitized ensuring that all data is destroyed.

Prolimax is a privately owned, **ISO 9001:2015** certified IT hardware and supply chain services provider, delivering value-added customer solutions to manufacturers, their channel partners and end users. Its main business Segment's include Asset & Lifecycle Management, Supply Chain Services and Computer Hardware Resale, with expertise in reverse logistics, asset management, manufacturing, system integration and product redeployment.

Global customers and their clients are served from Prolimax's headquarters in Shannon, Ireland, and its Operations facility in Nijmegen, The Netherlands.

Prolimax provides a full lifecycle solution.

From reverse logistics, refurbishment, to remarketing & recycling.

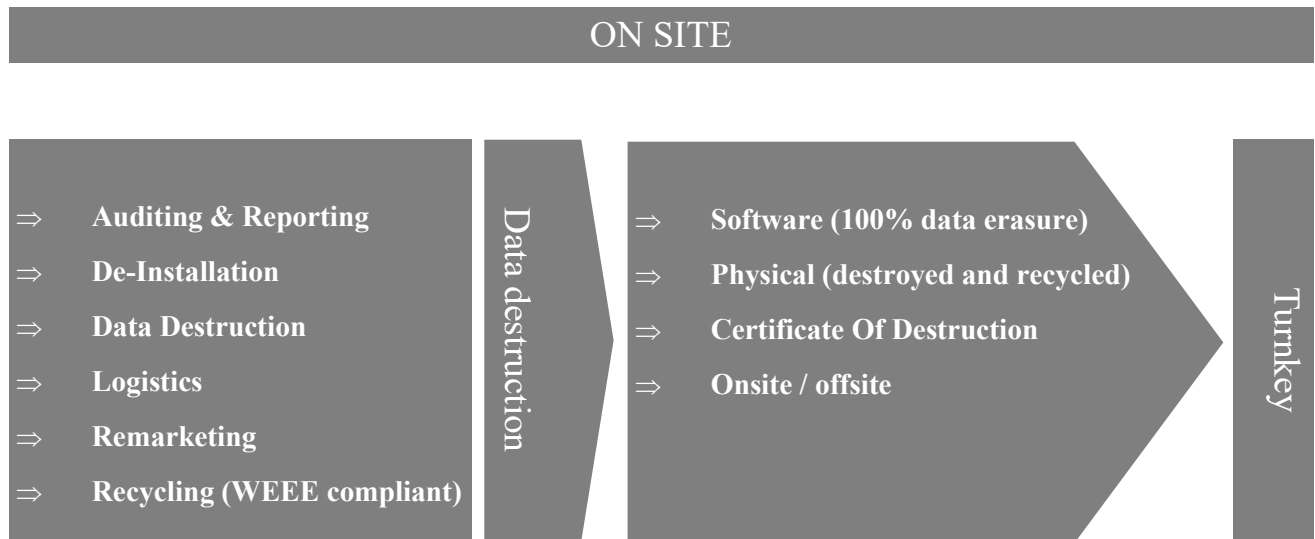

Safe and Responsible

IT Asset Management

Secure IT Asset Disposition

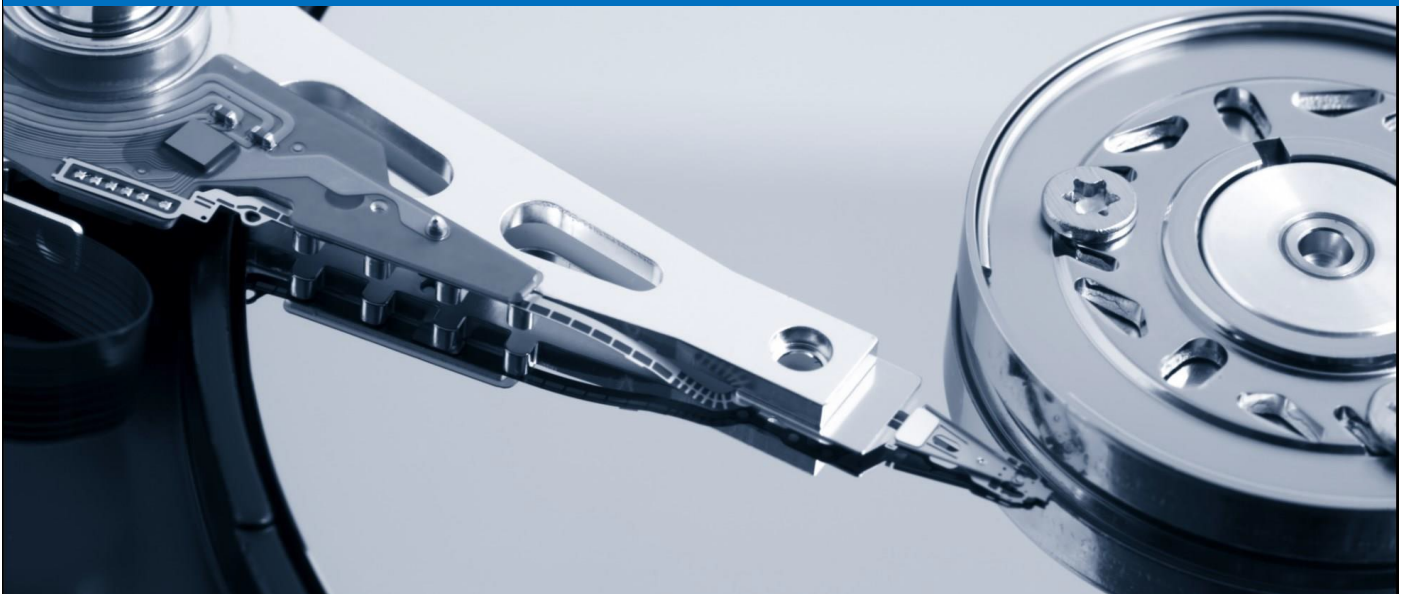

Our services are structured as follows:

OFF SITE

When sensitive data cannot leave your datacenter we can destroy on site. This ensures that nothing leaves your datacenter with recoverable information. We provide a range of services for destroying sensitive business data. Certified to government standards, our mobile destruction equipment can wipe or physically destroy hardware so that all data is destroyed and irrecoverable.

Secure Data Destruction

Decommissioning surplus IT equipment typically involves reverse logistics, data erasure, remarketing to recover residual value, and recycling.
